MAY 2009 CONTROLLED TEST

Unit ICT5 (b)

PUBLISHING

15 hours

Candidates may begin their research from 28 January 2009

The Controlled Test is timetabled from 27 April 2009

Context

An organisation is campaigning to raise awareness of the issues it is promoting. This organisation provides a printed magazine for members of the public. The organisation is updating its magazine but wants to maintain the same house style and ethos as the existing publication. This new publication will form the template for the future magazine.

In connection with the above, you are required to use ICT hardware and software to produce this new publication.

- The publication should be of at least **10** A4 pages or its equivalent.
- Within these 10 pages there must be a front page and an *automatically* produced contents page.
- There should be a proportion of text and images suitable for the intended audience and as required by the user specification.
- Candidates should have access to suitable hardware and software including good quality black and white or colour printers for final camera-ready copy.

INFORMATION FOR CANDIDATES

The assessment criteria for this task are presented below.

<i>Components</i>	<i>Max Mark</i>
Analysis of existing publication(s)	22
Specification and Design	27
Implementation	10
Maintenance	3
Evaluation	6
Project planning and standard ways of working	2
Total	70
