

- (c) (i) Determine the maximum and minimum gradients for your graph. [2]

.....

.....

.....

.....

.....

- (ii) Calculate the mean (average) gradient and its **percentage** uncertainty. [2]

.....

.....

.....

.....

.....

- (iii) Use your answer for the mean gradient to determine a value for the acceleration due to gravity, g . Quote your answer to the correct number of significant figures giving its absolute uncertainty. [4]
