

Printing off the BGS colour map extracts for past GL4 questions

Please note that when printing off the BGS Colour Maps for use with past GL4 Section B questions, the sheets should be printed off such that the grid squares on 1:50 000 maps are 2cm in length and the grid squares on 1:25 000 maps are 4 cm in length.

In this way the use of the scales for the Generalised Geological Column will provide answers appropriate to the mark schemes.
