

Computer Science and ICT Bulletin September 2018

GCE ICT

Centres are reminded that all coursework should be submitted on paper or alternately as a PDF file on CD / DVD. We have no plans to move the submission of coursework for this qualification to the SecureAssess online service this year. But may do next year, this would result in the work having to be submitted as PDF files only.

Please note that the final resit opportunity for the legacy GCE ICT qualification is in Summer 2019. A resit is available for all the units.

GCSE ICT

All coursework for GCSE ICT must be submitted via the SecureAssess system. Unit 2 as a PDF file and Unit 4 as a zip file. We will be enlarging the amount of space available to centres in order to remove some of the issues encountered this year.

The strengthened specification is now in place and all future examinations will be against that content.

GCE Computer Science

In response to the issues experienced by a small minority of centres we will be reviewing how content for examinations is delivered and issuing a circular detailing any changes. SecureAssess will continue to be the method of collection.

GCSE Computer Science

In response to the issues experienced by a small minority of centres we will be reviewing how content for examinations is delivered and issuing a circular detailing any changes. SecureAssess will continue to be the method of collection.

Centres are reminded that Greenfoot version 2.4.2 is the **only** version of the software that is valid for our examinations and all candidate responses are marked using this version only.
