Re WJEC Level 3 Certificate and Diploma in Business

I am writing this letter in support of the Level 3 Certificate and Diploma in Business qualifications developed by WJEC. These qualifications will appropriately assess skills, knowledge and understanding relevant to business. The applied focus of each unit will ensure that there is relevant and purposeful learning.

An emphasis on transferable makes this a useful and workable qualification for learners to gain. This course offers a good balance of skills including problem solving, taking ownership of research, development and presentation skills as well as independent working. This course really fits in with the concept of lifelong learning, giving students the fundamental ability to work with other professionals, in a professional environment and apply learning in vocational contexts.

The qualifications will provide learners with a broad appreciation of work in business and enable opportunities for progression into degree courses as well as work based training and apprenticeships.

These qualifications will improve the employability in such an important industry.

Yours sincerely
