

WELSH BACCALAUREATE Advanced

Global Citizenship Challenge Natural Resources Wales Natural Environment - 'Flow of Life'

Available for assessment from September 2015

Flow of Life

PURPOSE

The purpose of the Global Citizenship Challenge is to develop learners' skills, whilst providing opportunities to understand and respond appropriately to global issues. During the Global Citizenship Challenge learners will explicitly develop skills of **Critical Thinking and Problem Solving, Creativity and Innovation** and **Literacy** and apply them in an appropriate manner.

BRIEF

Natural Resources Wales purpose is to ensure that the environment and natural resources of Wales are sustainably maintained, enhanced and used now, and in the future. Our environment and natural resources are coming under increasing pressure – from climate change, from a growing population and from the need for energy production. Despite decades of work to understand, protect and improve our environment many of our plants and wildlife are in decline and we still have many issues to tackle.

Natural Resources Wales is taking a joined-up approach to managing our natural resources in order to build a healthy and resilient environment that can support economic and social prosperity for generations to come.

The Global Citizenship Challenge provides you with an opportunity to acquire knowledge and understanding of **biodiversity** and develop an insight into the challenges faced across the world in addressing this issue. You will develop and support particular arguments, viewpoints or perspectives on the global issue to construct your own **Personal Standpoint**.

If feasible solutions are to be uncovered it is vital to share your ideas of ways to take action through engagement with others. This Challenge provides an opportunity for you to promote your personal approach for solutions and strategies to tackle **biodiversity** at a Global Choice Conference.

The focus of the Global Choices Conference you will contribute to is:

"Maintaining and encouraging biodiversity along river courses is challenging. What approach should be taken to tackle this global issue?"

You should communicate your message in a creative and innovative manner to engage and encourage the audience to think and act as global citizens. The skills that you develop in the Global Citizenship Challenge will give you the ability and confidence to be an active global citizen, ready to make a positive difference in the world.
