Cymru

National  
Assembly for  
Wales

**Available for assessment from September 2015**

# Nutrition: Childhood Obesity

## PURPOSE

The purpose of the Global Citizenship Challenge is to develop learners' skills, whilst providing opportunities to understand and respond appropriately to global issues. During the Global Citizenship Challenge learners will explicitly develop skills of **Critical Thinking and Problem Solving** and **Creativity and Innovation** and apply them in an appropriate manner.

## BRIEF

Your school has been given the opportunity to submit evidence before an Assembly debate on **childhood obesity**. There is general agreement amongst politicians that childhood obesity is a problem that needs to be tackled. There is also agreement that there isn't a silver bullet to solve the problem.

During this Challenge you will use a variety of information on childhood obesity to investigate different views of people and identify your own ideas on **childhood obesity**. You then have to raise awareness of this matter with **Assembly Members** in a creative and innovative way. You should design your raising awareness so that it will appeal to **Assembly Members** and make use of effective communication by providing a clear message which is memorable, original and relevant.

By completing this Challenge you will show that you can reason, make judgements and make decisions in order to create an informed personal standpoint on childhood obesity. The raising awareness allows you to show how creative and innovative you can be in communicating your ideas and presenting your message to other people.
